

Muhammad Irfan Fadhila

Flutter Mobile Developer

✉ irfanfadhilaooo@gmail.com ☎ +62 82380599958 🌐 github.com/mirfan23

SUMMARY

Mobile Developer with hands-on experience in building enterprise-scale Flutter applications, including fintech ecosystems, PPOB platforms, HRIS systems, and digital cooperative super apps. Skilled in REST API integration, Firebase services, state management, payment workflows, geolocation systems, and scalable mobile architecture. Experienced in developing complex business workflows and delivering performant, user-focused mobile applications.

CAREER HISTORY

Mobile Developer Staff 07/2024 – Present

Kisel Group

- Developed enterprise-scale mobile applications using Flutter for fintech, HRIS, PPOB, and cooperative ecosystems.
- Integrated RESTful APIs, Firebase services, payment workflows, and banking-related transaction systems.
- Implemented scalable state management using Provider architecture.
- Built responsive and reusable UI components based on complex business requirements.
- Collaborated with backend, QA, and UI/UX teams in agile development workflows.
- Maintained application stability through bug fixing, optimization, and production support.

Mobile Developer Intern 02/2022 – 07/2022

PT Arkatama Multi Solusindo

- Developed Flutter-based mobile applications using GetX state management.
- Integrated REST APIs and Firebase services into mobile applications.
- Built mobile frontend features for Logbook and PWMP applications.
- Collaborated with development teams to implement scalable application features.

EDUCATION

Bachelor of Informatics Engineering 2023

Lampung University

- Led a team of 20+ laboratory assistants as Head of Computer Laboratory Assistants.
- Assisted and taught practical programming courses including Algorithms, Data Structures, and Web Programming.

COURSES

Android Developer Bootcamp 2024

PT Phincon

- Developed e-commerce and movie rental applications using Kotlin.
- Implemented modern Android architecture using Coroutine Flow, Koin, Room, and Retrofit.

MBKM Dicoding 2022

Dicoding

- Learned Android application development using Kotlin.
- Implemented REST API integration in Android applications.
- Developed FloristApp as a capstone project for plant community discussion and marketplace features.

PROJECTS

MyKisel — Digital Cooperative Super App

Flutter, REST API, Firebase, Payment Integration

Developed a multi-service cooperative super app integrating marketplace, fintech, PPOB, transportation, investment, and cooperative financial services into a single ecosystem.

Key Contributions:

- Implemented payment and banking-related transaction workflows.
- Developed scalable and modular Flutter UI architecture for multi-feature applications.
- Integrated Firebase services and RESTful APIs.
- Built complex business flows for marketplace and cooperative financial services.

iFMC — HRIS & Field Operations System

Flutter, Firebase, Geolocation

Developed an HRIS and field operations application with attendance management and operational reporting features.

Highlights

- Attendance, leave, overtime, payslip
- Operational expense submission
- CME, TE, MBP, generator fuel recording
- Geotagged photo documentation

Harmony — HRIS & Building Management System

Flutter, REST API, Maps Integration

Built an HRIS application integrated with building management and transportation operational workflows.

Highlights

- Attendance & payroll features
- Building monitoring forms
- Driver operational management
- Pickup/drop-off location tracking
- Reimbursement reporting

Marissa — HRIS Application

Flutter, REST API

Developed an HRIS application focused on employee administration and attendance management.

Highlights

- Attendance management
- Leave & overtime management
- Payslip system

SKILLS

Mobile Development

- Flutter
- Dart
- Kotlin
- Android SDK

Backend & Integration

- REST API
- Firebase
- Payment Gateway Integration
- Multipart Request

Architecture

- Clean Architecture
- Repository Pattern
- Modular UI Development

Deployment

- Google Play Store
- Apple App Store

State Management

- Provider
- GetX
- Riverpod

Device Features

- Camera Integration
- Geolocation
- Geotagging
- Push Notification
- Image Compression

Tools

- Git
- Android Studio
- VS Code
- Postman

LANGUAGES

- Bahasa Indonesia

- English
